

The brokers are not all Europeans

Largest component of the co-membership projection: 745 people, 4930 ties, area linear in betweenness.
Colour is the community the entry's own evidence settles, which it does for 245 of these 745 people (33%) — the grey majority are named only inside someone else's entry and have no notice to code. Among those coded, mean betweenness is 0.0129 for Tunisians against 0.0077 for Europeans. The 9 highest that could be labelled clear are named.

- Community not settled by the entry (500)
- European (198)
- Tunisian (47)
