

A membership roll and a committee are not the same kind of tie

Every stated membership in the volume: 65 of the 178 association entries give a number, and they run from 2 to 20,000 on a log scale. 39 of the 65 sit above the 60-member line at which the co-membership projection stops treating shared membership as a tie — being one of twenty thousand is not evidence that any two names on the list knew each other.
