

The brokers are not all Europeans

Largest component of the co-membership projection: 747 people, 4665 ties, area linear in betweenness.
Colour is the community the entry's own evidence settles, which it does for 254 of these 747 people (34%) — the grey majority are named only inside someone else's entry and have no notice to code. Among those coded, mean betweenness is 0.0200 for Tunisians against 0.0076 for Europeans. The 9 highest that could be labelled clear are named.

- Community not settled by the entry (493)
- European (206)
- Tunisian (48)
