

Three quarters of the notices print no career sequence at all

Biographical notices by the number of posts parsed from the CARRIÈRE rubric. 1,065 of 1,403 have none, and the 338 that do carry 1,474 posts between them — a median of 3 and a maximum of 37. Career sequences here are therefore a rich sample of a minority, not a property of the elite as a whole, and modelling them as the latter would select on the volume's own generosity.
